

# Be more productive. Automatically.

Grow your business productivity by automating repetitive, time-consuming tasks with **Microsoft Power Automate**.

## Drive end-to-end intelligent automation for everyone

Enable automation across your legacy, on-premises, and cloud apps and services. Unlock automation with Microsoft Power Automate—a low-code cloud automation platform—that unlocks analog data with AI, automates UI with RPA, and orchestrates APIs with built-in connectors. All these capabilities are available in a low-code, end-to-end automation platform in the cloud.

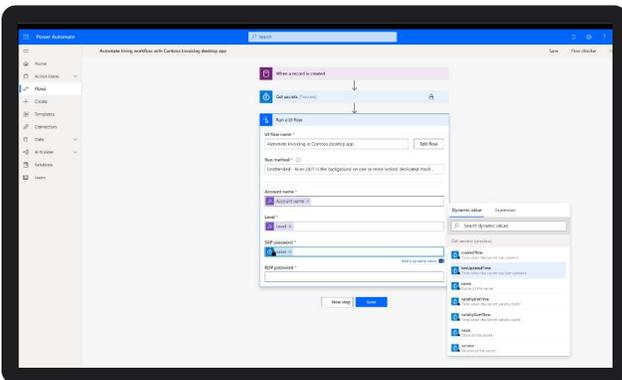

# 1.

## Automation at scale

Efficiently scale across your organization

Allow everybody in your organization to automate business processes using their favorite apps and services with a low-code solution that encourages bottom-up innovation across your organization. From end users and professional developers, to IT.

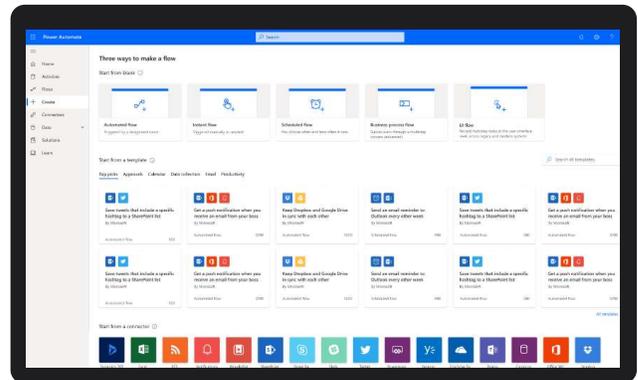

# 2.

## Accelerated productivity

Accelerate productivity and focus on more strategic work

Create more time for your team's strategic work and drive your business forward. Minimize repetitive, manual, time-consuming tasks and create more time for your teams to focus on strategic work with easy to use low/no-code tools, templates, and connectors.

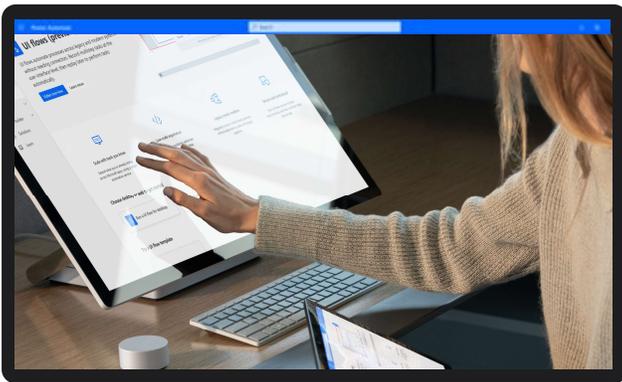

### 3.

#### Seamless, secure integration

Securely integrate automation at every level more securely, with confidence

Confidently integrate automation across your organization by enabling everybody to build automated workflows in an environment that is more secure and compliant. Rest assured knowing that data loss prevention is built in, while adhering to strict controls for data privacy and security.

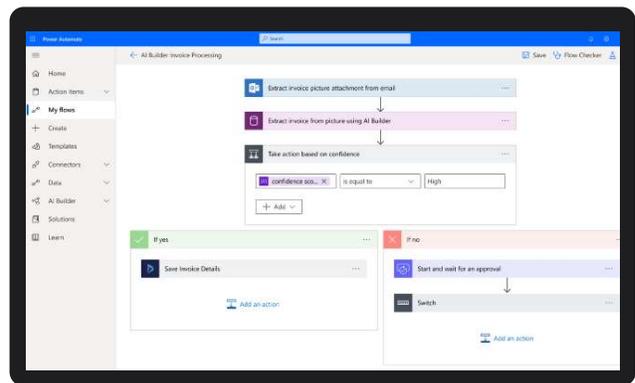

### 4.

#### Intelligent automation with AI

Automate business processes and workflows with the power of AI

Streamline how you work by combining the power of AI with automated workflows and business process. With AI-driven capabilities like forms processing in AI Builder, end users can parse data from these analog sources.

Using Power Automate, you can get started quickly with prebuilt connectors to hundreds of on-premises and cloud apps and services. Automate processes within the apps you use every day with seamless integration across Dynamics 365, Microsoft 365, and Azure.
